## sample Fruity Pebbles - D8 Gummies

| Sample ID SD230503-016 (74669) |                       | I                    | Matrix Edible (Other Cannabis Good) |                       |  |
|--------------------------------|-----------------------|----------------------|-------------------------------------|-----------------------|--|
| Tested for Summitt Labs        |                       |                      |                                     |                       |  |
| Sampled -                      | Received May 02, 2023 |                      | Reported May 09, 2023               | 5                     |  |
| Analyses executed FP-NI20      |                       | Unit Mass (g) 34.126 | Num. of Servings 6                  | Serving Size (g) 5.69 |  |

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.04% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either ()48-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC canobinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 Concentration is estimated to be: 05.5%
